We've realised Key Strategic Projects within large broadcast corporations for many years. For example, our tireless work on the Sky *AdSmart* solution has won Sky the **Media Innovations of the year** at the October 2014 Media Week Awards.

A current key project today is to deploy media of all sorts to TV and mobile devices of all shapes and forms

For over 20 years we've been working with the big names in the Broadcast industry to bring innovative solutions to market within tight time-scales and budgets. Our experience ranges from all aspects of head end broadcast technology, right down to the set-top-box in the home. Interactivity, VOD, OTT, IPTV from Consultancy and Design right through to Execution and Delivery.

Our services include:

- Business and technical strategy development
- Architecture, design and systems testing (with our Automated Test Tool)
- Requirements capture
- Project and programme management
- Technical and operational support
- Vendor selection and management consultancy
